**Site Plan:** In the space below prepare a diagram showing the lot dimensions, existing buildings, sidewalks, and driveways. Clearly indicate the location, size, and height of the proposed structure(s) with distances to property lines in all directions. When required, show landscaping, parking spaces, surface water control, and/or sign locations. This site plan does *not* need to be drawn to scale but does need detail sufficient to support your application for a zoning permit. Failure to provide sufficient and accurate information may cause a delay in the processing of this application. If desired, a site plan may be furnished as an attachment to this application.

Please Note: This is an application for a zoning permit – it is NOT a building permit or an electrical permit. There will be a separate fee for and approval of those permits based upon the value of the work done and/or the number of circuits involved in the inspection process. There may also be fees due for razing which requires an asbestos inspection by a West Virginia State Certified Asbestos Inspector. If you have questions, call City Hall at 304-636-1414.

A large grid of graph paper, consisting of 20 columns and 20 rows of squares, intended for drawing a site plan. The grid is empty and occupies the majority of the page below the text instructions.

**Please check the proposed used for site:**
